

VISION

A FIBERSMITH SOFTWARE SOLUTION

Third Annual User Conference

Exhibitor Space and Sponsorships

June 4-5, 2024

Columbia, MO

Event Overview

The 3rd Annual Vision User Conference will include attendees from a diverse group of providers from across the country. All have expansion projects to grow their network underway or planned in the near future.

At the event, attendees will take a deeper dive into Vision, Fibersmith's B/OSS system to help ISPs rapidly grow their subscriber base and manage all aspects of their business.

The event will feature informative and educational sessions from the Vision team, hands-on workshops to immediately put ideas into practice, and invaluable interactions and connections with fellow Vision users.

The size of the group and overarching themes of learning and collaboration create a unique opportunity for attendees and vendors to interact with each other and cultivate mutually beneficial partnerships.

"Everyone was so helpful and welcoming, and we had some great conversations with other vendors and attendees. Looking forward to next year and bringing more of our customers into the group."

-2023 Vision User Conference Sponsor
